SYNAFIL – The high-performance fillers for
cosmetic and skin care applications

SYNAFIL – The high-performance fillers for cosmetic and skin care applications

SYNAFIL is ECKARTs cosmetic filler series. They can positively contribute to product properties like texture, skin feel and pay-off.

SYNAFIL S fillers are based on synthetic fluorphlogopite and set themselves apart by their outstanding color purity and remarkable low heavy metal content.

Based on these characteristics, SYNAFIL S is suitable for face and body care applications like night and day creams, BB/ CC/ DD creams or moisturizing lotions. Due to its tight particle size distribution and light reflecting features, it can also help reduce skin imperfections like freckles or small wrinkles around the eye or lip areas. In color cosmetics, SYNAFIL S can be used in all segments ranging from foundations and concealers to pressed and loose eye shadows, powders, blushes and all kinds of lip cosmetics like balms, sticks or glosses. Used solely or in combination with ECKART effect pigments, these fillers provide perfect optical appearance of the skin and improves the adhesion of make-up.

SYNAFIL W 1234 is a polypropylene wax based filler for cosmetic applications. It can be used to add a velvet-like skin feel and mattify formulations. This wax can also support mousse-like textures. SYNAFIL W 1234 is the perfect choice to boost eye-catching sparkle effects in specifically adjusted color cosmetic applications like creamy and pressed eye shadows, powders and nail polishes. As a mattifying agent it can be used in foundations, powder formulations and creams.

Handling

No use restrictions. Detailed information on use levels as well as formulation guidelines will be provided on request.

Packaging

SYNAFIL S: 5 kg, 25 kg
SYNAFIL W: 1 kg, 5 kg, 20 kg
